

LUCAS BASTOS

Data Analyst | ETL, Data Modeling & Revenue Analytics

Florianópolis, Santa Catarina, Brazil (Remote – GMT-3) | +55 48 98449-7572 | lucasboliv@gmail.com
linkedin.com/in/lucas-bastos-56756084 | github.com/lucasboliv-coder

PROFESSIONAL SUMMARY

Data professional focused on turning data into business impact. Experience across fintech, education, manufacturing, and commercial operations, with a background in ETL, data modeling, business intelligence, KPI development, forecasting, and revenue analytics. Skilled at structuring data from multiple sources, improving process reliability, and transforming operational and transactional data into decision-ready insights. Strong interest in financial and transaction data, with emphasis on data integrity, clarity, and measurable business value.

PROJECTS

PixFlow Analytics — Personal portfolio project | Live demo: pix-analytics-portfolio.streamlit.app | github.com/lucasboliv-coder/pix-analytics-portfolio

- Built a 4-dashboard Streamlit analytics app (Users & Ticket, PIX In/Out, Blockchain & Bridge, Financial Projections) simulating a PIX/crypto payments fintech, with synthetic transaction data generated deterministically in Python.
- Designed a reusable dark-mode design system (shared Plotly template, KPI cards, custom CSS) applied consistently across all dashboards.
- Modeled multi-year financial projections (2025–2029) across 3 scenarios (Conservative/Pessimistic/Optimistic) for two portfolio companies, adapted from a real financial model with all identifying data anonymized.
- Stack: Python, Streamlit, Plotly, pandas, numpy.

CORE SKILLS

ETL & Data Pipelines | Data Modeling | Revenue Analytics | Financial & Transaction Data

SQL | Python (Pandas) | PostgreSQL | Power BI | Streamlit | Excel

KPI Design | Forecasting | Dashboard Development | Business Intelligence | Process Improvement

PROFESSIONAL EXPERIENCE

Data Analyst | Truther ResolvePay

Jun 2025 - Present

Remote

- Act as the first data professional in a crypto-payment environment, helping structure the data function from the ground up.
- Built ETL pipelines in Python for transactional data across crypto, PIX, and banking systems, loading curated datasets into PostgreSQL/AWS environments.
- Modeled financial and transactional data to calculate revenue, fees, profitability, and product-level performance metrics.
- Developed interactive dashboards in Streamlit and automated reports to improve visibility into transactions, behavior, and business performance.
- Supported business and product decisions by identifying inconsistencies across databases and improving data reliability.

Data Analyst | Vitru Education

Aug 2023 - Jun 2025

Florianópolis, Brazil - Hybrid

- Managed KPI tracking, forecasting, and variance analysis to support planning, performance monitoring, and strategic decision-making.
- Collected, cleaned, and prepared data from multiple sources to compare actual versus planned performance across indicators.
- Produced clear executive reports explaining significant variations and supporting business action plans.

- Contributed to the foundation and development of junior-enterprise projects focused on process structuring, innovation, and organizational management.

Business Intelligence Analyst | Komeco S.A.

Jun 2021 - Aug 2023

Palhoça, Brazil - Hybrid

- Used TOTVS ERP, SQL, Excel, and Power BI to structure and analyze unorganized operational data.
- Unified 42 performance indicators into a centralized dashboard to improve monitoring, insight generation, and decision-making.
- Built analytical models and projections to support supply chain visibility and performance management.
- Developed a supplier funnel to monitor negotiation stages and support sourcing decisions, including the use of international market data.

Data Analyst Intern | Cottonbaby

May 2018 - Jun 2020

São José, Brazil - On-site

- Supported sales and commercial operations through data extraction, modeling, and large-scale analysis.
- Structured lead-tracking and CRM-based funnel analysis to improve visibility into conversion and commercial performance.
- Contributed to process optimization through lead enrichment, reporting, and data-driven insights.
- Worked with Sankhya ERP, SQL, Excel, Power BI, and CRM tools.

Business Intelligence Intern | Brognoli Negócios Imobiliários

Aug 2016 - May 2017

Florianópolis Region, Brazil - Part-time

- Supported commercial intelligence activities through data analysis, reporting, and performance monitoring.
- Organized business data and helped produce reports to support operational and sales decisions.

SELECTED HIGHLIGHTS

- Built data pipelines, dashboards, and financial metrics to support transaction visibility and revenue analytics in a crypto-payment business.
- Centralized 42 KPIs into a single BI panel, improving performance monitoring and management visibility.
- Delivered planning, forecasting, and variance analysis to support executive decision-making in an education group.
- Improved CRM funnel visibility, lead monitoring, and reporting across commercial operations.

EDUCATION

Federal University of Santa Catarina (UFSC)

Bachelor's Degree in Information Science (data/information systems focus) | 2019 - 2024

Data Science Academy

BI Tools for Data Science | 2021 - 2022

TOOLS & LANGUAGES

Tools: Python, SQL, PostgreSQL, Power BI, Streamlit, Plotly, Excel, TOTVS ERP, Sankhya ERP

Languages: Portuguese (native), English (professional)
